

Design Project # _____

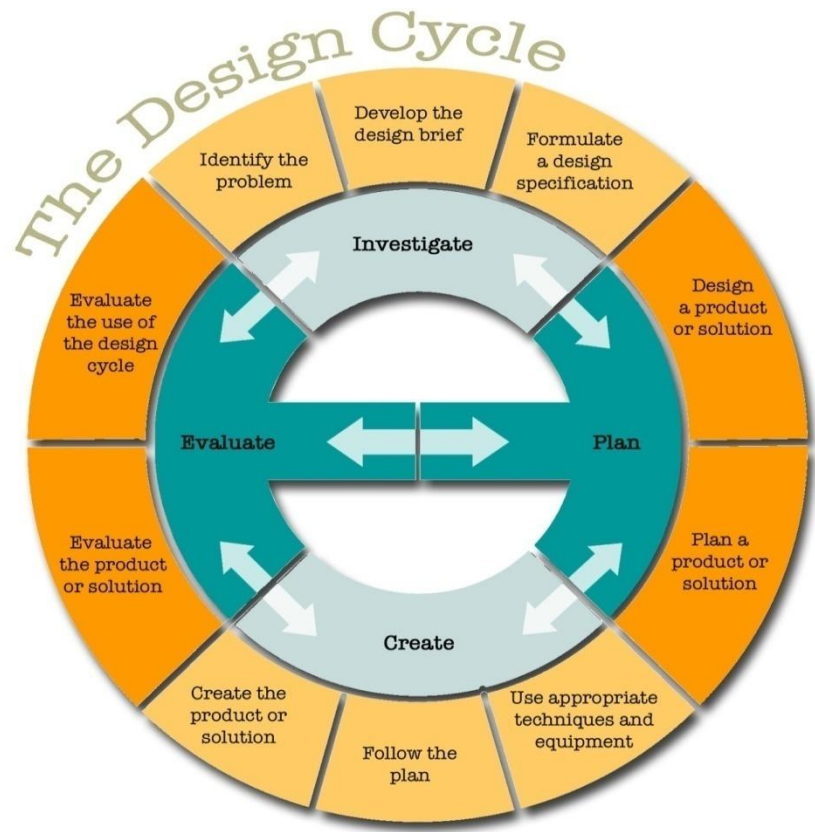

Grade 7

Date: _____

Guiding Question:

Name: _____

Class : _____

Plan

Your goal in the Plan criterion should be to come up with your work plan (work plan: a class by class plan of what you are going to do to solve the problem). In this case, the steps that you need to follow to complete the product. Discuss how you will organize your time and resources with your group mates.

Make sure that you have a clear time plan that shows a number of steps, time management, logical organization, and forward planning. To get a 6 in plan you should be able to:

- create a logical sequence of steps that shows how you will spend your time (to create your product)
- devise logical steps to take that will lead to you creating your chosen product
- analyze the plan and explain the need for any modifications to the design
- be specific as possible.
